While building our own **FaaS** platform, we needed a tool that would allow us to reliably test **FaaS** platforms' performance in different scenarios. This is why we created **FaaSbenchmark**, an open-sourced written in Go to benchmark **FaaS** platforms.

Nuweba | FaaS Benchmarking Made Easy: Introducing FaaSTest.com and ...
Serverless adoption is growing rapidly every day, but some o...
nuweba.com

Hadn't seen this before. The @Cloudflare newsletter about serverless (blog.cloudflare.com/serverlist-3rd/) pointed me to this **benchmark of FaaS** providers. Shows overhead (time for function to respond) and cold start time. Wide spectrum!
serverless-benchmark.com

2 2

Nuweba @nuweba_hq · Nov 27

It's not just about #coldstart - #FaaSTest can do so much more!

For Example: Third-party tools overhead, Function composition overhead, Cloud services performance using **FaaS**, Triggers latency ... and so much more!
Check out -> faastest.com
